Well I'm very strategic, and when I am on nod and have destroyed the obelisk, and seen a large vehicle defense, I always get a stealth soldier with nuke. But sometimes I apc rush with tech, and if you're a good driver and get lucky, you can ram the mammoth tank hard enough to open up a space for you. But I have sneaked into a base with 2 mammoth defense, you just have to time it right and be smart. Just to let you know it's not foolproof.
