30 total c4 Includes all proxy,time and remote. As far as placement, There are several good tactics depending on the map you are playing. Dont get into a battle of the same team Miners. Poof,poof,poof. usually both you and your team mate see some c4 dissappear, Think about it if you palce some to replace yours his go poof , he replaces them yours go poof. While there is no totally perfect way to use c4. there are several improper techniques. Don't place c4 on c4 it doesn't do twice the damage. Don't line them up touching each other, Dont' Place 20 of your 30 in any one place. If frindly fire is on don't place them on your buddies. (you can kill enemys this way). It is fun to place them on your team mates to see their reaction but it is generally frowned upon.As a tech or hotty your best defense in a close up fight is to pop your remote c4 before you get shot or drop some proxies in a crowded room. I've stopped multiple engy rushes with the c4 a hotty-tech carrys
