Subject: How the aircraft patch should be, IMHO...

Hmmm, that's weird. I ALWAYS remembered Orcas having missiles, and only missiles. The original C&C, Tiberian Sun...when did they ever have a machine gun? I never saw them have one in the SP of Renegade; again, just missiles. And this isn't necessarily my prediction of what the air patch will be, per se, because I know it is not. It is just what I think the air patch should be like to keep things even. Like I said, I was bored.
