I found a buggy Combination in the map that has the tiberium in the cave. Buy a buggy, and drive to the part where there is a ramp and outpost covering the path for vehicles going to the GDI base. then turn your buggy such that the back part faces the ramp and the front part faces the tiberium refinery and airstrip-outpost. then go back and ur buggy will move up and go into the covered path. then quickly drive to the other end near the gdi tiberium refinery. get outta ur buggy and keep to the wall and move into the refinery and finish it off. then the GDI will suffer. If you prefer a technician for this buggy tactic. Go ahead and use a technician. So far, using this u can only get up to the refinery
