I've noticed this when I put a map change in the mplayer practice. Yet, I don't believe a lot of people know this. There's also a very hidden place in Field, I saw an enemy hiding somewhere but I couldn't find him. Sudden a hotwire looked where he was and he ran out from behind the water fall (not the one way, at the base of the level you can get behind the water there as well). Great for snipers.
