On the topic of C4 and Proxies and Timed, What if a person were to quickly plant 5 proxy mines on your APC; front bumper and sides just before you rush the tower, maybe it would cause a little extra damage, maybe hurt a few people on the way in? Usually the tower is a bee hive of people when you get there and you usually run over or pass a few fellows as you near AGT. The only problem I can see is as each proxy goes of it would damage APC even if friendly fire is off?Is it a wastefull use of 5 of the 30 available mines?
