(quoteregarding your suggestion about weakening the ft. i absolutely disagree. the ft is the only nod vehicle with real teeth when it comes to rushing a base. the only other weapon that can do major damage quickly is the ma and it's armor is too weak to be a rusher....)once i rushed with two friends using mobarts in a 3vs3 game and it kicked ass destroyed the whole gdi base in three minuets includeing advanced guard tower it was the mission with the waterfall in it(forgot its name )
