well you really didn't elaborate on why you think the stealth is cool.. surely it's not cuz he "looks" cool..lol. anyway, here's one reason why they're cool. i was playing gdi on islands(defensive as usual) i had mined the tunnels coming into the base and bought a hummer and parked near the front entrance, hoping to keep any inf from penetrating from that direction. but suddenly there was a nuke beacon warning. i drove around till i started hearing the beeps and got out to find it(cuz i saw no one else going for it, otherwise i would've stayed in the vehicle. i found it and started defusing. well you can guess what happened. the stealth who had planted it popped me in the head for a quick kill and the refinery was toast. now that's a good use for the stealth!
