??? Maybe some thoughts about mining tactics?I was wondering what is best way to say protect AGT from a 2 to 3 person APC rush?I'm torn on what is best. 1. Lay 3 mines under MCT, then 2 or 3 inside door, then 1 to 2 outside door.I,m thinking laying mines to close to MCT, enemy can throw C4 at it from a distance, and also how to stop the 2 suicide men who clear area for # 3. You say 1 can't kill it himself, true but somehow the AGT gets knocked down just a bit from the rush.I can't seem to stop organized rushes?The same goes for other structures, there is NO way to sufficiently protect the it seems, of coarse we have other fighting members but I have been in one game after another with the same guys and they would win everytime within 7 mins like clockwork, I really think maybe we need a 40 mine limit in the future when everyone starts working together smart like.
