i dunno if it works, but, for example on the map C&C\_walls, theres a tunnel! what about taking a vehicle, for example a stealth tank down there, get up over the tunnel, and place the nuke exactly on the tank! now u got a mobile nuke device, with hase not to be planted anymore! the stealthtank is quite fast, and then u drive simply next to a building, and let the nuke \*\*\*! as far as i know, u should even survive this attack! i never tried out thisone, coz normaly one team wins bevore u get a stealth and a nuke, or someone is stealing ur stealth be4 the nuke can be plantet! but probably it works, so just try out!
