Turrets use c4. Hand of Nod place it in the dark spot right b4 the steps begin going from the mct to the pedestal. Barracks usually place it on the pedestal ..or outside in the back of it. War Factory behind the p**** (that is accross from the mct) in the garage ..or some corner on the outside. Airstrip in the elevator type thing inside the building. Power plant behind the control p**** thing in front of the mct, or on the outside corner. Refinerie either inside in that corner thats behind the mct but usually i stick it in between the building and the big silo type thing on the side. Obelisk and Advanced Guard Tower i wont give that 1 away
