Yes, hackers suck. I hate having to have protection running in the background while playing games. It's just sad. The last time I didn't bother doing it was ages ago while playing INFANTRYZONE extreme. I wiped out 4 guys on one team with a single plasma bolt cos they were too close together. One of them Pm'd me and said he was getting his mate to hack me for cheating. 2 mins later my computer locks up, then blue screens. Never again will I leave my computer unprotected. Some people are just weird. By the way asshole, if you're out there. I WASN'T cheating, I'm just good.
