
Subject: Do you like Mobius or Raveshaw more?

Raveshaw or sindey are good for support during attack because of their longer range and their single shot. It takes them more time to destroy a tank than mobius or mendosa, but they can cover while reloading, and they can also kill infantry in one shot (they hate that!!!) mendosas and mobuis are excellent fo defence because people usually concentrate on attacking the main target during a rush, hoping they'll destroy it (Flame rush is the best exemple, and the best way to stop one it by all being mobuis!) Really depend on what you use them for.... But about the tunel thing, I agree that mendosa/mobius is the best choice!
