Well, it's kinda weird. I was playing Patch on Under (the only true GDI sneaky unit! ) and I got inside their refinery. The airstrip being right in front of it, I thought I'd steal something big and nasty. So I waited for someone to buy a flame tank, and when it happened, I rushed to it, only to find out I could not hop in! The NOD saw me, so I ran back to the refinery, but the tank was faster
