HEHE...Only once has tha cargo plane killed me. I joind a game on the islands.mix, and the first I heard was:Hand of Nod destroyed" (I was Nod)So I looked outside the controltower and saw a mammy starting to pound the refinery. I decided to buy a stealth tank that would last long if I used it right, and our airfield was destroyed(which was very likely)But as soon as I entered the stealt, the lag "dragged" my tank against the mammy, even though I was driving in the opposite direction Suddenly, my stealth dissapeared an he mammy pounded me. So i tried to put some speed on my shiny engy ass and ran over the airfield, turned around and saw the huge cargoplane mow me down Way too long story, shoot me
