i dont think you are right ... i think the nod side is better then gdi, sure good team work can overcome this. i played over 100 games and i won a lot more games with nod, they stealth is very good if u use it right. a 4-5 flame tank rush is so deadly and very hard to counter if u dont have a realy good team. GDI needs 1 exit for the barx else it is to hard the defend against stealth blackhands
