Me again...Need some more help . OK its the mission where you get a light tank after you escape the prison and have to make you way past a million Noddies from helicopters before you get to the research facility. I can't find the Alpha and Beta master control terminals, nor the prisoners. I've been through the facility many times and while I can destroy the Tiberium containment dome, I can't find anywhere else... Everywhere is a dead end. I thought that when you go into the subsurface "dig" area that that would lead somewhere else, but if it is, I don't know where to find it! ARG! Any help would be much appreciated.
