OK,I'm about to be labelled a newb, but i can live with it. I played the demo all last week, and finally got my copy of thegame last night.I got a hotwire into the power plant. Dropped all my remote c4 and timed c4 on the MCT for the enemies power plant.After detonation of all 4 (I thought there were a total of 5 but i counted only 4) C4s. The power plant still had 2 bars of health. Am I missing something?
