WOL Stats from my favorite server Since Apr 14, 2002:GDI: Total Score = 24,554,343 / Wins = 832NOD: Total Score = 23,717,890 / Wins = 700My personal stats for this month:GDI: Better than 2:1 win:loss ratioNOD: About 1:..75 win:loss ratioFrom that data it would appear that GDI does have the overall winning advantage. Maybe the players on the server and myself both don't play n0d as well as we could? Possibly, but the numbers above seem relatively clear to me. [July 24, 2002, 19:41: Message edited by: Jeg]
