Subject: My map al screwy

Posted by Anonymous on Tue, 18 Feb 2003 08:41:00 GMT

Thanks General HavocThat is very usefullbut as i stated i did not change much in the maps (just a little texture remapping...)and suddenly i sometimes see nothing while im around or in a building...its limited to one shape. As soon as i stand on that shape everything but that shape turns invisible...Granted that that specific shape is the bulk of the map. Could it have anything to do with vertex paint?Thanks for your information Hope you will help again.
