get it from <http://www.sourceforge.net/projects/rentools/>The main thing is the fixed CTF scripts, there is a new script for doing a stealth suit powerup there also.If you have, use, play or whatever any CTF maps, upgrade immediatly. If the maps are *.mix maps, then just upgrading the scripts.dll in the renegade folder with the 1.0.1 dll will work. If they are in *.pkg files, you have to replace the scripts.dll in the pkg file. There is a program at http://www.renevo.com/downloads/sp1_0_1.zip that will patch the dll to 1.0.1 for you.
