Yesterday we from TSB set up a server for TSB_InstaGIB the server is 4 vs 4   without lag (for european ppl)you can joit it by ASE or Gamespy or Ren IP[TSB]Instagib tsb-clan.tk|32ms|195.64.94.158:4848The server is hosting Instagib Version 2.0c that comes out @ sunday... the problem is a verry buggy map in this Version and it is not smart to host this map...We are looking or we going to work on the mod again but nothing is sure.The V2.0c is an old package we create a year ago but we never putted it online, and now we will...So all check our website www.tsb-clan.2ya.comwhen everything goes like planned it is online @ sunday.BTW: with TSB version 1.0b you can visit ourserver to but you can not play all maps...//Poost   [January 24, 2003, 23:45: Message edited by: [TSB]Poostmen]
