I've modeled an orca bomber for my mod. It's currently about 90% done, still got to put a couple small things and the bomb bays on the sides...(copy paste the url's, my temp host doesn't allow off site linking... :/

)http://phx.bravepages.com/orcabomber_1.jpghttp://phx.bravepages.com/orcabomber_2.jpghttp://phx.bravepages.com/orcabomber_3.jpgSo what do you guys think? Any Comments? (btw, This took somewhere between 2.5-3.0 hours...)(guess the total number of polygons that are currently in the model and you get a lolipop) [January 19, 2003, 08:39: Message edited by: Sir Phoenix]
