"A script such that you will be lifted into the air by a certain amount (basically adjust the Z value) on zone entry (JFW_Bounce_Zone_Entry)"I could do a reincarnated System Shock map with that! If anyone played System Shock, you'd remember the lift pads that you step on to go up in the air, sort of like an anti-gravity lift with no elevator parts.Dude that's awesome! I could bring the first level back to life by doing that!
