Ok there are some people out here that actually want to read the forums without seeing pages of flaming becuase someone said something. ACK although i am grateful for all the work you have done would you think before you post. The person here has put up a very useful site whilst Dante's Mod Exchange is down i have found it useful. After Dante posted a confirmation that it's ok you continue to post. All the useful modding posts are flooded with flamers belonging to you mainly like the one about the W3D and Gmax conversion. I respect all people who have helped to mod community but your one of the ones who has to flame the forums so we can't read the rest of the useful posts.
