I have this Alligator that INGROWNLIP added the vehicle bones for. (dont ask why LOL) and It wont turn. I made sure the wheel bone names are correct, IE Left and Right. any1 who could help me, Please PM me with your E-Mail and I will send U the GMAX file, for U to look at and/or fix. Please, this is a critical part of C&C_Swamp and the map wouldnt be the same without it.(Alligator follows PDS_Test_follow_waypath is the Idea)Thanks, and oh yeah, KANE LIVES!
