Noobs listen! After you post a topic or a reply, if you find you want to delete it or you accidentally double posted, there are ways to fix this. if you look at your post there is an edit button (looks like a little picture with a peice of paper and a pencil), if you click on that you can check a box to delete that post or edit the contents. USE IT! [December 28, 2002, 20:49: Message edited by: DeafWasp]
