What I am still waiting for is a converter that will work so i can use Lightwave, Coldfusion, Maya, Poser, and Bryce. My Mac feels neglected...spend 4 grand on a mac...what can you do with it?...burn cd's, create audio/video, and play solitare. Ive got all this really great design software but for some reason, none of the gaming companies support it. If i could even figure out a way to use my 3ds max instead of Gmax for renegade I would. Ok enough of my rambling...blood sugar low..must go consume edibles.
