This is the last revision. This small island off of the Bahamas is being battered by tropical storm Gordon. Heavy winds and rain have been reported and the island has been long since evacuated. A Tiberium meteor has slammed into one of the mountain ridges and is spreading the so-called plant further across the globe.Homepage: http://www.cncrenegade.info ; http://www.cncden.comThis file is the property of the creator, all rights and copyrights belong to the him.
