nope, wrong. We can indeed send someone into the future, but we cannot bring them back. because all forward time travel is, is moving so fast that time around you actually slows down. in fact you could actually look behind you and see a sort of "chrono shadow".this is actually light bouncing off of you so slowly that when you move away from your position that the light has yet to move away from where you were. seeing as how you are moving faster than the speed of light.
