quote:Originally posted by DarkOmen:it drives like the recon bike of renegade but the weapon is improved....Now this interests me. How so it is improved?Anyway, I learned how to make the bike not spin out as much =], you just lower the suspension a bit, just not too low or it won't move all together. I think I used .45 (or was it .40) suspension and it only spins out when I attempt to make jumps (this is more like a 50:50 chance though, doesn't always spin out).
