A lot depends on how you ask (and who) Back in 1997/98, I started working on a Quake mod based on C&C, called Command&Quake (original, huh?). This included driveable vehicles, full C&C bases, etc etc. I had a kind of tentative permission from Westwood to do it - they acknowledged that I was doing it, and that's all. Some companies will tolerate your use of their intellectual property as long as they are informed of it, and the appropriate disclaimers are made. The major problem in this case is that you'd be making something that effectively competes with Renegade, and that's going to work against you.
