I did, just that I didn't have the script to do it upon command and have it remove credits, I created a very random spawner and the choppers flew in from there. It isn't that hard to create a script that has the vehicle fly into a helipad... Nor is it hard to create a path for the vehicle to follow... Please do not get into a fight with me, I am in an incredibly bad mood today. [ December 07, 2002, 11:52: Message edited by: ApacheRSG ]
