quote:Originally posted by jordyybear: quote:Originally posted by aircraftkiller2001:As for maytridy or whatever the hell his name is: Renegade's engine can handle an immense amount of polygons. Textures are what slows it down. Then why are you making such a big deal about his models? I think he actually thinks they look pretty good and he wants them to try and reduce the polygons so they will run on his system... I have come to learn the Aircraftkiller just wants people to do their absolute best possible so they will not look bad in the future if something comes up such as a lamer with a poor computer...
