Yeh, both are included and when I the try to start leveledit, there is a 'Leveledit exerption ..etc. will be closed.etc.pp' error, the it continue loading, and I can use the scripts. But if i have save tzhe level leveledit crash to desktop, but level is correctly saved. when I then export the Mod and start it there is an exerption in game.exe(renegade) it can continue 2 times, but then it crash.I use Win98 my Hardware is P4 1.8 Ghz, 512 MB Rambus. Raid 0 IDE + SCSI HD.I'll retry it with the new (verison .95 is the current?) Version again.Hm is it possible for you to write a good Samsite Script? The Westwood things don't work proberly.
