i'm having problemb with getting online.....i have been running tests on this new map i made but the game keeps freezing.could a lost WOL connection cause the game to freeze?It's been happening to me every since the last two patches.....i have had it happen to me without any mods or new maps in my data folder so i know it isnt the map.Any ideas what's going on with the server and how long it's going to be down?Eric.
