I need help with my GMAX, after working about an hour or so on an outpost for my map in progress. It just came up with an error and shut down GMAX. every time I try and open the Level this error occurs:Failed to open file : c:\documents and settings\[rest goes here]\outpost.gmaxThis problem has only happened to me twice, on the second time only after 5 mins of work it crashed . How I fixed it you might ask, i didn't. [ November 15, 2002, 22:08: Message edited by: chompy ]
