quote: 9/11/2002, Friday, November 2002 <http://www.blender3d.org/> Blender 3D suite: Blender is a cross platform 3D creation suite, allowing fully integrated modeling, animation, rendering, post production and interactive 3D creation and playback. We are in the process of bringing back the old Blender product website. For the time being check www.elysiun.com for more info This program runs on windows and linux, its small, its free and it creates 3d images. What else is there to say?
