"This TYPE of file COULD harm your computer IF it contains malicious code." - Notice how it says it "could" contain a virus. - Notice how it says "if". - And the TYPE of file is .exe = it is *possible* any executable application has a virus. You have to ask yourself, do you trust the ftp you are downloading from? Do you TRUST Westwood? The answer is NO YOU HAVE NOT FOUND A VIRUS! That program you use will ask you the same question every time you try and download a exe file (as long as you have that button ticked!).
