For those of you who have modded with SunEdit 2K I have a question. I have downloaded mods that other people make for TS and I've also made my own. I see new unit images all the time (i.e. medium tank, scrin commando, light tank, etc.) that don't appear in TS.My question is, is there somewhere I can download some of these images or must I make my own?Also, I think when I say images I mean voxels or something like that. Thanks in advance.
