I have a radeon 9000 pro and love it.However, im going to return it tomorrow, and i urge you to wait.Radeon 9500's come out soon. For a non-pro its going to be 30 bucks more than the 9000 pro 128, and be faster, and be directx 9 compliant. It only has 64 megs of ram, but hey, thats what they invented AGP for, IMHO.R9500 pros will be availble with 128 megs of ram for about 70 bucks more. These will definitely be faster than the 9000, and directx9 compliant.worth waiting another couple of weeks for IMHO
