This is what I am developing, a kit that comes with a user-friendly database of tutorials on how to make a renegade map. Includes how to make buildings, units, and infantry. this pack will be the ultimate learners guide, or for those people who already know how to make maps, a resource pack that includes hundreds of textures and pre-built models. also included a complete guide to skinning. why do you care? because #1 this won't take a year to get finished like so many mods out there. also it will include many other cool items. When it is finished it will help launch me, Sterio and VirtualOctopus' new site. which i will not give the name of now. But I need some Staff to help me out. Wanted: -Skinners, -Texture Creators, -Vehicle Makers, -Infantry Makers, -Building Makers, -Writers. And if you know me, I don't settle for low quality [October 17, 2002, 20:40: Message edited by: DeafWasp]
