---

i am making a new mod for renegade. i just begun today. this mod will be small i can probably finish it in a few days. this mod is based on Continuum, excpt now its in 3D. For those of you who dont know what continuum is. well its in space, and tring to kick some butt. you will battle in space ships with different special abilities. there will be 8 different vehicles.thats all for now...oh and new members are needed. 1 Modeler (Space ships)2 Skinners1 Mapper (maps in space)thats all i need really. i know before i said i can do it myself but the faster the better. cause i no generals is comming up. so then there wont be any plp left playing renegade. i will soon post a pic of one of the ships.
