bump and progress report, i am working on the first map, as i probably stated before. The first is alway the hardest to configure, after i finish that i will surely be on my way to finishing the rest rather quickly. (would have been nice for someone to volunteer for that, oh well...)anywho, thanks for all the bumps and thanks for all the help, special thanks goes out to, Blazer, Abjab, Ubertek, Scorpio9a, Princess Cocoa, and Steven Denman. You all have been great, and hopefully you will all love this program as much as i am starting to.Dante
