You know, I'm a VB programmer myself (Can't wait until the Education authority validates my

wondering, how exactly do you plan on making the AI using VB, this isnt critisism, jsut curious. I thought you had to assign the scripts to objects through the commando editor, and even when the scripts.dll source is released, it WILL NOT be in VB, i can guarantee that!Correct me if I am not getting your point here, but i was just curious.
