RenxWow, I cannot fucking believe you had the ignorance to go and attack OUR betas. I'd show the pages upon pages of bug reports the reborn had, but they were all deleted :rolleyes:

I didnt say that Reborn wasnt buggy. I was showing the bugs that RenAlert has and the poorer work in the mod.

The only detail I see in that picture is a slight bit of brown to the left of the ammo count. Its the ingame images that count, not just the renders.
