Subject: will renguard stop this... and is it allowed?

---

I was mucking around on one-player LAN recently, and I found that I could use magnifier to give me weapon independent clear scoping.

A screenshot of it is at <http://www.n00bstories.com/image.view.php?id=1234892282>

I would like to know two things:

1. Is this allowed on the n00bstories servers, or on any other major servers (black-cell, UN, Fastconn, Renstation, etc)
2. If not, will renguard stop it.

Please note that I have never used this, or the OGC icon on my desktop online (it's for CS 1.3).
