Wish we could include a Spectator Mode for Renegade. Many manufacturers have incorporated this into their games. Sure would cut down on the cheaters. Just select player who's view you wish to see and piggyback.....You'll see everything they see...yay

To me this would be the ultimate upgrade. Even better than Renguard. Mods could piggyback suspected unfair players, take SSs while piggybacking, see ammo counts, check severity of shot damages etc, etc.

Just a thought.....don't flame me too bad.....

Thanks for your cooperation
