Yeah, but my server is slow since my server is at my own home and my upload speed is terrible, it's 128. I'm working on getting a paid server though on server matrix. I'm about halfway there because of the ads on my site, just gotta wait till the end of the month if I get \$100 Google sends me a check. Once I get a paid server though the downloads should be really quick.

OT: Think I could use 1200 GB bandwidth in a month? I've used 11 in 1 month because of RenAlert on my slow server I currently have.
