Quote:First of all, YOU are not the person who can say it's quality or not, the only people who can give a judgement are the people who made the game(graphics of it), e.g Eric gooch.

And I do not recall any Aircraftkiller, Sam Site or Jonathan(I think that's your name, I vaguely remember it of that e-mail you sent to all people having password problems with the forum of renalert) in that list.

Also WHY are you and the rest of the RA Dev team the only ones saying that it has no quality, and the rest find the majority of the mod ok.....

I just don't get it.....

I can say whatever I want about Reborn. Namely, that it sucks.

It's not just my development team that hates Reborn, it's the majority of this community.
